

REPORT ON CATARACT SURGERIES SPONSORSHIP IN AUGUST, 2025

To: The Management, Love Vision Foundation

From: Eye Foundation Hospital, Abeokuta.

Month in Focus: August, 2025

Subject: Report on Cataract Surgery Sponsorship at Eye Foundation Hospital, Abeokuta

1.0 Introduction

This report provides a summary of the cataract surgery sponsorship program executed in August, 2025 at the Eye Foundation Hospital, Abeokuta. The surgeries were made possible through the generous funding and unwavering commitment of the Love Vision Foundation, and this report aims to document the success of the initiative and the profound impact it has had on the lives of the beneficiaries.

2.0 Activity Summary

In the month of August, 2025, four patients were successfully treated for cataracts under the sponsorship of the Love Vision Foundation. The surgeries were performed at the Eye Foundation Community Hospital, Abeokuta branch – 5, Olugbenga Awe Avenue, Access Medical Road, Ijeun-Lukosi, Lemme, Abeokuta, Ogun State.

Five patients were planned for surgery for the month of August. This included four patients for the month and one patient postponed from last month. However, due to high Blood Pressure of the fifth patient, only four patients had surgery and the fifth patient's surgery was postponed to the following month – August, 2025, with the hope that the BP would have been controlled.

The details of the patients who received the surgery are as follows:

- **Sodamola** [REDACTED]: A 52-year-old female, [REDACTED] whose vision has improved, giving her the opportunity to actively pursue her trade and compete evenly in her market place with other competitors.
- **Ogundele** [REDACTED]: A 62-year-old female, [REDACTED] whose sight restoration has taken her away from a dependent life and is expected to relieve her of shortages on her trade which has been due to the poor vision.
- **Afuape** [REDACTED]: A 13-year-old female [REDACTED], whose vision has now been restored and has now been bestowed with the opportunity and hope to do well in her studies having removed the barrier that the impact of the loss of vision has caused her academics.
- **Bello** [REDACTED]: A 73-year-old male, [REDACTED] who has regained his vision, significantly improving his quality of life and independence in his golden years.

3.0 Impact on Patients' Lives, Families, and Livelihoods

The impact of the cataract surgery in the life of a Cataract patient is that of a story of getting out of darkness to light – the restoration/improvement of vision, the story of independence, and that of economic stability. The Love Vision Foundation's sponsorship has had a direct and measurable positive impact on the lives of the four patients and their families.

For an older patient like Bello [REDACTED], the surgery has restored his ability to navigate his surroundings safely, engage in social activities, and maintain his independence, which is vital for his dignity and mental well-being at such an old age. Similarly is the case of Ogundele [REDACTED], who had suffered limitation due to the poor vision and had put her in a bad financial situation which was as a result of consistent shortage that she had to suffer on her trade as a result of the limited vision she suffered. So close also is the case of Sodamola [REDACTED], who was also limited to the periods she could work due to the limited vision in the day and close to nothing at night, for someone whose trade's peak period is always in the evening. The newfound clarity of sight means they are no longer dependent on others for simple tasks, reducing the burden on their families and empowering them to compete evenly in their trade and with the opportunity to lead fuller lives.

The case of Afuape [REDACTED] is particularly impactful. At a young age of 12, trauma caused him cataract. This later became a challenge for him on his academic and social performance. By restoring his vision, Love Vision Foundation has not only given him back his sight but has given him hope for a better and fulfilled life. He can now get better in his academic and social performance and with the hope of a bright future ahead of him.

4.0 Conclusion and Gratitude

The sponsorship of these cataract surgeries is again a sincere show of love from Love Vision Foundation in its commitment to making a noticeable difference in the lives of those in need. The outcomes of this initiative show that targeted support can lead to profound and lasting change. The Eye Foundation Hospital sincerely appreciates this partnership as it is evident that it would make its mark in the mission to eradicate preventable blindness and restoring hope within our communities.
